## AIRBAND MANAGED FIREWALL/VPN

Take advantage of our turnkey solution to protect your employees, your data, and your business.

Enterprises face an ever-increasing need to provide their employees, vendors, and mobile workforce access to their corporate LAN while keeping unwanted visitors out. Without a robust firewall/VPN solution, enterprises face a host of threats from hackers, viruses, and other malicious content, which can threaten their network and data integrity.

Airband provides the expertise required to configure, proactively monitor and support a robust solution that delivers the level of confidence companies' demand in their IT security strategy.

### Key Benefits:

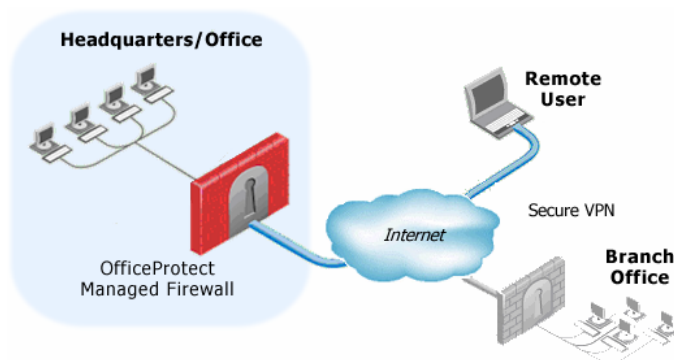

Fully Managed Solution

Certified Installation

Proactive Monitoring

No Capital Investment

Secure VPN Capability

**Stateful firewall** protects the LAN from intrusion, viruses, and other malware

**Secure VPN** provides remote users with secure access to the corporate LAN

**Anti-spam** filters emails from unwanted content

**Content filtering** blocks undesired website access
